

The VSE Team has provided outstanding service to our company. The corrosion control services performed by their team have resulted in a cost effective solution for the refurbishment of our industrial floor equipment. Component replacement was thought to be our only other option. In discussing our corrosion problems in detail with their technician, the VSE Team offered a sound solution that has made efficient business sense. We now have a corrosion-free, durable and protected piece of industrial equipment performing well in the field that looks virtually brand new.

Thanks VSE C2T!

A handwritten signature in black ink that reads "Matt Moore". The signature is written in a cursive, flowing style.
