

TESTIMONIALS

"Can only say good things about the VSE team. Great to work with. VSE did everything expected and more. One piece of equipment was in bad shape do to were it was functioning in a highly corrosive environment with caked on buildup. They showed up on time, were courteous, worked in the designated area they were assigned to, and completed their job in excellence. We would hire them again without question highly recommended. All the equipment especially the tough one turned out exceptionally well."

Randy McCabe, Southeastern Equipment, Perrysburg Ohio
